

“CONTAINER WITH DEVICE FOR STIRRING AND SERVING  
POLENTA”

\*\*\*\*

5

ABSTRACT

The invention concerns a container or pot for preparing polenta which has a body (11) with an internal semi-cylindrical bottom (12), a turning stirrer (15) on the bottom of the body, a gearmotor device for controlling the rotation of 10 the internal stirrer, and a distribution outlet (17) in one wall of said body on a level with its bottom. An obturator means (20) is associated with the distribution outlet which moves between a closing and opening position for a controlled distribution of the polenta by means of the internal stirrer.
